**AI-Ops**

# Operational clarity powered by embedded, real-time intelligence.

Linque AI-Ops layers actionable AI directly into your operations, helping teams detect issues early, prioritize key actions, and continuously improve without disruption.

## Why Linque AI-Ops?

- Break down silos and unify workflows with platform-agnostic orchestration

- Detect critical issues early and guide immediate response

- Accelerate AI deployment with systems designed for plant floor realities, by manufacturing experts

- Ensure oversight with built-in governance, traceability, and visibility

- Integrate seamlessly with cloud, hybrid, or on-prem systems

**Results:**
Faster, better informed decisions, fewer disruptions, and better ROI

**AI-Ops**

# AI-Ops in Action

AI-Ops converts operational noise into clarity. Continuously monitors data streams & operator actions, surfaces anomalies in real time, and equips teams with the context they need to act decisively, shifting the focus from firefighting to forward momentum.

HOW IT WORKS

# Intelligence Where Operations Happen

Linque AI-Ops embeds intelligence at the edge, in the cloud, or across hybrid environments. It unifies workflows, prioritizes what matters most, and ensures every action is logged for governance and accountability.

### Unified Oversight
One connected layer across IT, OT, and AI workflows.

### Faster Detection
Real-time anomaly spotting that prevents downtime before it spreads.

### Governed by Design
Transparent logs and controls that make accountability automatic.
